- Approximately 20,000 acres annually
- Artillery Impact and Ranges every year
- Most Training Areas on 3 year rotation

### ✓ Benefits

- Military training
  - Improves maneuver and visibility for military training within the forest
  - Reduces loss of training time due to fire control
- Wildfire danger
  - Reduces the risk, number, and size of wildfires
  - Reduces the damage resulting from wildfires because the wildfires don't burn as hot
- Ecosystem Management
  - Longleaf/wiregrass are fire dependent species  
USFWS Biological Opinion (19 Aug 15) for RCW management
- Wildlife Forage Enhancement
  - Many native forage species require fire
  - Soil fertility enhancement

## 20-Year Deer Harvest Trend

**USAG, Fort Gordon, Georgia**

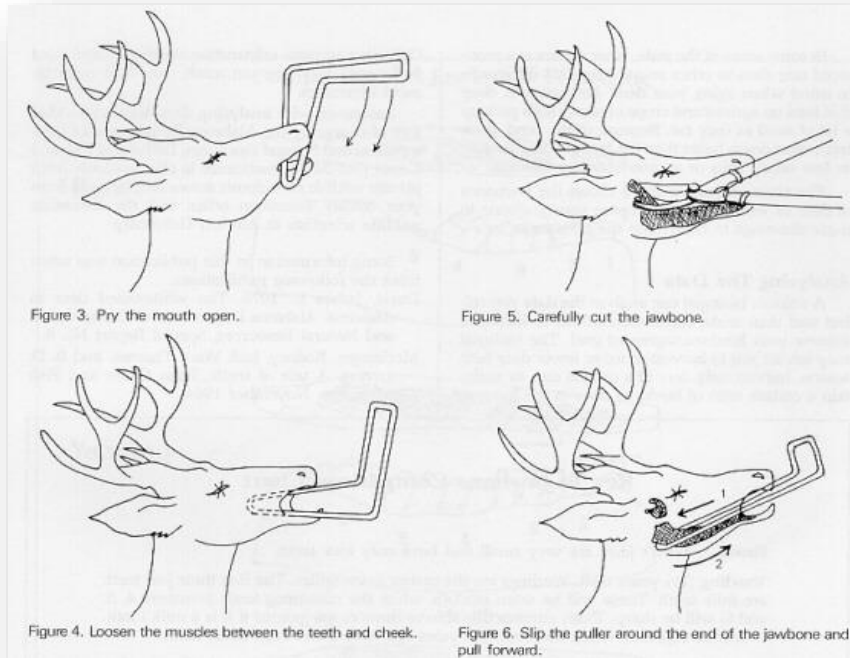

# NRB 2020 Fall Public Briefing

## Deer Check Station

- ✓ Checked 24 does and 41 bucks in 2019-2020
- ✓ 99% jawbone submission rate (several poor samples, 20% of submitted jawbones)
- ✓ Check station requirements have not changed with iSportsman

**USAG, Fort Gordon, Georgia**

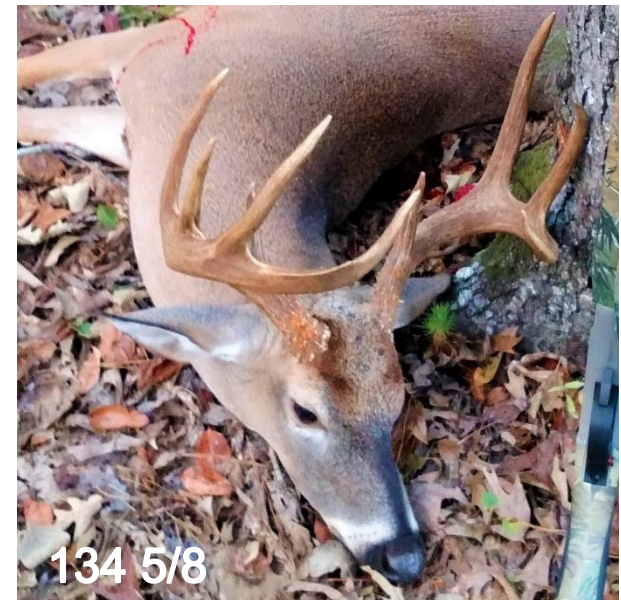

# NRB 2020 Fall Public Briefing

## Antler Data

- ✓ Last season we had 9 deer measured over 120 inches Gross B&C and 5 of those were greater than 130 inches Gross B&C. The actual number of trophy deer harvested is likely higher since not all deer get measured (38% of harvested bucks were measured last season).

## *SAIA Rule Change*

- ✓ **SAIA buck antler restrictions no longer apply.**
  - Buck/Doe ratio is skewed
  - Antler measurements of the bucks harvested over the years have not shown a significant difference to those bucks harvested outside the SAIA.
  - In addition, SAIA access is limited. To increase harvest opportunities and assist with the improvement the sex ratios within the area NRB biologists have decided to remove antler restrictions.

## *Antlerless Deer Harvest Quota and Regulation Reminders*
